

SABRINA V™

Debut of H-Material™ utilized as the front baffle. A high-density organic and phenolic based composite.

Resistor access has been simplified by relocating it from the bottom of the enclosure to the back.

State-of-the-art drivers:
Alexx V Convergent
Synergy Carbon™ (CSC)
Tweeter & the XVX Alnico
(ALuminum, NiCKel, CObalt)
QuadraMag® Midrange Driver.

Taking a page from the Acoustic Diode® design, V-Material™ has been nested and integrated into the bottom of the enclosure where the spike diode interfaces.

VXILSON®
